## Donate Blood Plasma and Help Save Lives

Updated July 30, 2020

Print

People who have recovered from COVID-19 have antibodies in their blood that may help treat people who have recently contracted the virus. So far, over 40,000 patients have received plasma treatment for COVID-19. This treatment, however, needs the help of eligible Americans to donate their plasma. Do your part to help in the whole-of-America fight against the COVID-19 pandemic – find out if you are eligible and how to donate at [www.coronavirus.gov](http://www.coronavirus.gov).
